High Performance

Truck Scale Installation without the Headaches

METTLER TOLEDO

Save Time and Money

Installing Your Next Truck Scale

Low Installation Costs

Our specially designed trucks are fully equipped for delivering and installing truck scales. They eliminate the extra cost of renting a crane and purchasing specialized installation tools. You save money by dealing with a single supplier.

Project Management

From the moment our delivery truck arrives on site, you have everything needed to install the scale. You do not have to schedule the rental of a crane or other equipment. The factory-trained driver can supervise the entire project, including calibration and certification.

Quick Startup

By combining delivery and installation, you eliminate delays on site. Steel-deck scales can be installed and ready to start weighing in less than a day. Concrete-deck scales can be completely installed and ready for the concrete to be poured.

High Performance

You benefit from the expertise that our factory-trained drivers bring to your project. With years of experience installing truck scales, they can ensure that the job is done safely and correctly. The result is a truck scale that is ready to perform at the highest level.
