

Reduce Equipment Inventory

With Wide Range Conductivity Sensors

Highly Stable Digital Signal

Intelligent Sensor Management (ISM[®]) technology converts the conductivity measurement into a highly stable, robust digital signal which is sent to the transmitter, enabling the sensor to quickly respond to minor changes in conductivity.

Fast and Easy Installation

ISM's Plug and Measure feature makes sensor installation fast and easy, since all relevant status and configuration information is stored in the sensor and automatically transferred from the sensor to the transmitter during startup.

Easy Traceability

Identification, calibration and maintenance data is stored in the UniCond sensor, which allows for clear traceability. The sensor meets strict NIST-traceable calibration requirements.

Wide Range for Streamlined System Design

Measure makeup, RO, DI and wastewater with a single wide range conductivity sensor. Streamline equipment inventory and system design complexity by reducing the number of fitting types, housings and insertion lengths required.

UniCond Sensors

Superior Measurement Accuracy

The UniCond[®] conductivity sensor provides an exceptionally wide measurement range due to its advanced built-in circuit. The sensor can be used to measure everything from ultrapure water to brackish water (up to 50,000 $\mu\text{S}/\text{cm}$).

The digital UniCond sensor reduces equipment inventory by enabling the measurement of an extensive water purity range with a single sensor model. The advanced measuring techniques of the UniCond conductivity sensor contribute to superior accuracy over an extended range. UniCond exceeds performance of conventional sensors due to built-in measuring circuits and analog-to-digital signal conversion in the sensor head.

UniCond Technical Data

UniCond Sensor

Accuracy	0.01 cm ⁻¹ sensor: ± 1 % 0.1 cm ⁻¹ sensors: ± 1 % for 0.01–5,000 µS/cm; ± 3 % > 5,000 µS/cm 4-E sensors: ± 4 %
Repeatability	± 0.25 %; ± 2 % for 4-E sensors
Temperature sensor	PT1000 RTD, IEC 60751, Class A, with NIST-traceable calibration
Temperature accuracy	± 0.1 °C at 25 °C; ± 0.5 °C for 4-E sensors
Maximum cable length	91 m (300 ft)
Finish (sanitary 0.1 cm ⁻¹ sensors)	Ra 0.2 micrometers (8 microinches), 316 L SS is electropolished
Insulator material	PEEK except for the CPVC sensors
Response time	90% of value in < 5 s
Connector	IP 65, mates with 5808027X series cable

Ordering Information

Description							Order Number
Fitting	Insertion Length "X" mm (inch)	Fitting/Body material	Range (µS/cm)*	Cell Const. (cm ⁻¹)	Electrode Material	Max Pressure at Temp bar(g) (psig) at °C (°F)	
¾" NPTM	34 (1.35)	PTFE/SS	0.01–50,000	0.1	Titanium	17 (250) at 93 (200)	58031404
