

Get More, Spend Less

Keep Current while Saving Time and Money

Stay Up-to-Date

iC software is constantly improving as new features and refinements are added, through product innovation and ongoing customer feedback. iCare ensures that you always have access to the latest version of iC software at no additional cost.

Save Money

Technology changes very quickly and software changes even faster. iCare is the most cost-effective way to stay up-to-date and saves considerable amounts of money over the lifetime of your instruments.

Prevent Obsolescence

As computers and operating systems continue to evolve, so does iC software. iCare helps you adapt to the ever-changing IT landscape, and by delivering access to new features, extends the useful life and value of your instrument.

Ensure Compatibility

When you have more than one instrument, iCare will ensure that data sharing and exchange continues to work seamlessly between the units. By keeping all instruments on the same software version, training time is reduced and issues associated with maintaining multiple versions of software are eliminated.

iCare Software Maintenance Plan

iCare was developed as the direct result of customer feedback and is designed to provide subscribers with the opportunity to always have the latest version of software while paying significantly less over the lifetime of their instrument.

Whether you have one instrument or many, iCare provides a variety of benefits including all version upgrades, service packs, instant software downloads, and easy, electronic mechanisms to request features and get support. iCare keeps your system current and your software budgets predictable.

Technical data

iCare Software Maintenance Plan Get More, Spend Less

iCare includes all major and minor upgrades and service packs for Instrument or Office versions of iC software products as well as priority email support. As an active iCare subscriber you are also eligible for special offers and discounts on related products and services.

Why is it important to use the latest version of iC software?

New features and modules are constantly added based on customer feedback and industry trends

- Usability improvements and added capabilities save time and help get the most out of your instrument
- Compatibility with new intelligent D2i modules enables you to distill complex data sets into valuable knowledge

Newer versions provide **better connectivity** with other applications

- Connections between iC software and third party tools are constantly expanding
- Integration and data exchange among iC products is also improved with each release

Save money on future upgrades by joining the program at today's prices

- iCare subscriptions are a modest, predictable expense that can be easily budgeted. More importantly, iCare reduces your total cost of ownership while increasing user productivity.
- iCare includes updates to purchased D2i modules at no additional cost

Specifications

iCare is a subscription service that is renewed on an annual basis. The term of the subscription begins from the original software license activation date or last iCare expiration, whichever is later.

iCare is available for Instrument and Office copies of:

- iC IR™
- iC FBRM™
- iC Raman™
- iControl RC1e™
- iControl LabMax™
- iControl EasyMax™

Accelerate Development with iC Suite

The iC Suite of software supports *in situ* spectroscopy, particle system characterization, calorimetry and precise reactor control. iC software integrates your entire experiment workflow making it simple to visualize, interpret and report your results.

Intuitive, Consistent User Interface

The iC Suite is a true revolution in data collection and analysis for reaction monitoring and is designed to be easy to learn and remember.

Seamless Integration Between Products

When multiple iC products participate in the same experiment they automatically share data and coordinate tasks even when the software is distributed across multiple computers.

Easily Transform Data into Information

iC software helps scientists distill information-rich data into valuable process understanding through the integration of chemometrics and informatics that enable faster and better decisions.
