Ergonomic and space-saving
Increased space for sales transactions

Bright displays
Clear and easy to read: The customer and operator displays of the bC-H22 have an anti-glare, anti-reflection display screen with a wide reading angle. The adjustable backlighting ensures a high-contrast display even in the case of unfavorable lighting conditions.

Simple paper changing
The removable printing unit facilitates a simple and rapid paper change, while the print head is easily accessible for cleaning purposes. The paper for sales slips and labels is output below shoulder height and thus prevents wet sleeves during operation caused by flowing water.

Fast operation
The bC-H22 hanging scale provides the highest level of operating convenience with the tried-and-tested METTLER TOLEDO Light Touch keyboard. The removable keyboard is simple to clean, while the freely configurable keys can be individually labeled simply and conveniently.

Targeted sales promotion
Take advantage of the scale housing for your advertising campaigns: Advertising images and messages can be applied to the customer's side of the scale housing at ease thanks to the magnets included in the scope of delivery. In this way, you can really draw attention to your offers.

Compact housing
All interfaces and connections as well as the antennae of the WiFi unit available as an option for wireless scale networking are safely protected against soiling and damages thanks to the easily removable plastic ABS cover.

bC-H22 hanging scale
Professional hanging scale with a compact design

The METTLER TOLEDO bC-H22 hanging scale is the classic weighing solution for fish sales and sales stands where little space is available for presenting fresh produce. Thanks to its suspended design and the hard-wearing plastic ABS housing, the electronics of the scale are optimally protected against spills, acids, salt and oils. The key to a successful sales pitch: the slimline housing does not block the customer's view and eye contact can thus be maintained at all times.

The bC-H22 hanging scale has a label printer for sales slips, continuous labels or labels and can be networked with all modern scales from METTLER TOLEDO's bC scale family as standard.
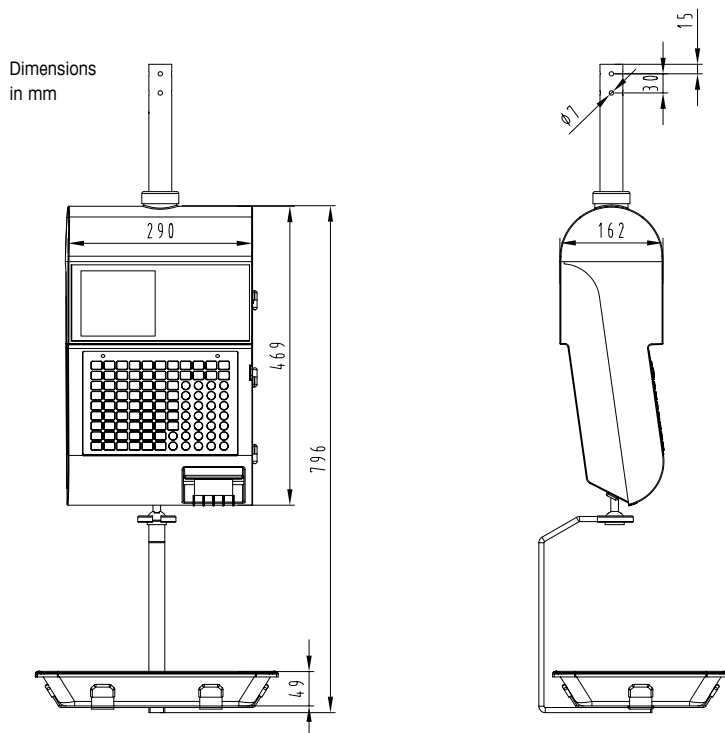

METTLER TOLEDO

Tactile bC Retail Scales

bC-H22 hanging scale

Robust and powerful – for professional requirements
