

FreeWeigh.^{compact}Net – profitable filling with a clear conscience!

Say goodbye to the tightrope walk between profit and compliance

- ▶ A low-cost, simple solution to avoid overfilling
- ▶ Reliable product control within statutory limits
- ▶ Rapid payback

METTLER TOLEDO

FreeWeigh.Net^{compact}

Benefit from the capabilities of FreeWeigh.Net compact:

- Compact single-user weighing system with the capabilities of a large control and statistics program
- Precision filling of liquids, tablets or creams in accordance with statutory limits
- On-the-spot quality and final packaging control for narrower fill quantity limits and fewer tolerance violations
- Easy-to-create informative reports and statistical evaluations from the rugged SQL database
- Traceable process and batch documentation as required by GMP
- Intuitive operator guidance and automatic data evaluation
- Option of **21 CFR Part 11 compliance** with electronic signatures and audit trail
- Can be extended to create a networked FreeWeigh.Net multi-user quality system connected to an MS SQL server

FreeWeigh.Net compact has it all:

FreeWeigh.Net compact is a complete solution which along with the local SQL database (MSDE) can be installed on a computer running Windows 2000 or XP. The standard package includes all the functions you need, e.g., for collecting sampling data from a connected balance or plotting statistical data as sample or production mean values (\bar{x} charts) or in *r/s* charts.

Performance enhancement options:

You can use these add-on modules to further enhance the already impressive capability of FreeWeigh.Net compact:

- Attribute and test plans
- Adjustment algorithms
- Customised reports module
- Batch handling
- SPC module
- Connection module for measuring instruments
- Audit trail, 21 CFR Part 11

A worthwhile investment in the future:

- FreeWeigh.Net compact is a reliable and easy way to move into statistical quality control and optimisation with METTLER TOLEDO.
- You can extend your FreeWeigh.Net compact system without losing your investment by re-using existing installations and software licenses.
- The operating principles for your system are always the same, even if you extend it, so internal training costs are reduced.

Sales and service:

Do you want to boost the profitability of your filling operations? Then do yourself a favour and order FreeWeigh.Net compact today.
