Automatic Wrapping and Labeling
with Maximum Film Savings

METTLER TOLEDO

Increase Productivity and Save Film and Space

Model 8361 SmartTouch®
Prepack Controller

- **Wrap up to 30 packs per minute**
- **Impressive ROI with film savings alone**
- **4-way film stretch for tight attractive wrap**
- **Automatic tray sizing...no selection required**
- **Apply up to 3 labels...price, merchandising, bottom label, plus security tags**

The SOLO® MAX and SOLO® XL automatic wrappers are ideally suited to your mid to high volume wrapping needs with speeds up to 30 packs per minute...and no changeover time or selection between different tray sizes is required. The SOLO® MAX and XL use only a 13" film roll to wrap all trays, even family packs...25, 7, and 10 x 14. The SOLO® XL is also available in an 11" film version to match your specific application.

Both wrappers allow you to easily select film tightness...standard tight stretch for most packs and a reduced stretch wrap for sharp edge or delicate products.

An optional extended infeed conveyor is available for the SOLO MAX to provide the ability to "flood feed" the wrapper and achieve maximum throughput and productivity.

SmartTouch® Prepack Controller

The SmartTouch Prepack Controller is a programmable prepack controller featuring an easy-to-use touchscreen. A simple touch of a finger accomplishes most tasks making operator training fast and easy to learn. For quick PLU look up, 1400 preset keys and more are available. Fast operation with reduced training time means increased profits.

Auto-Labelers

The Model 706 and 705 Auto-Labeler indexes, weighs, and applies both price and optional merchandising labels and security tags to wrapped packages. Compact design and non-corrosive material construction make them ideally suited for perishables production areas. The built-in scale provides fast, accurate weight...and there is easy access to the weighing area for weighing and labeling pre-wrapped packages.

The Model 710 Bottom Label Printer applies bottom labels to your packages automatically. Any information you can print on top, you can now print on the bottom.

Label Printers

The Model 317 Thermal Label Printer includes many value-added features such as fast print speed, large label capacity, graphics printing, and high resolution. You get label printing of text in multiple font sizes, graphics, safe handling, and nutrition facts. To reduce your labor costs, you can include two 317 printers with the Model 706 or 705 Auto-Labeler...one to print and apply the price label and the second to print and apply merchandising labels.
